

Multi Award  
Winning

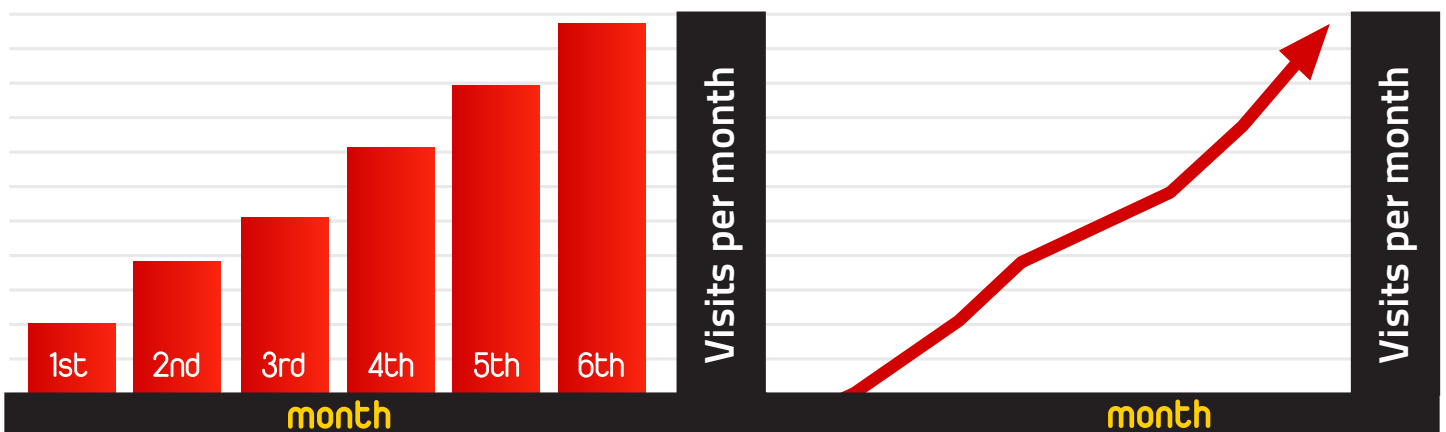

“ Good, savvy SEO is not an option in today's fast-moving markets - **IT'S ESSENTIAL** ”

Search Engine Optimisation (SEO) is vital to ensure the maximum number of visitors reach your website. A strong, continual SEO campaign will heighten your visibility and make sure your website is made more relevant.

- Over 90% of Internet users find websites through search engines.
- 3 in 4 people agree that search engines help them find services they haven't thought of before.

## What SEO can do for you

Increase visits to your website

## Do I need a Website Health Check?

Is your website under-performing? Do you want your website to achieve more for your business? Our professional Website Health Check will help you understand the key factors that affect the performance of your website.

- **Is your website achieving its objectives?**  
Our Health Check will show you how you can change this.
- **How relevant is your website to its target audience?**  
Our Health Check will show you how can it be made more relevant.
- **How prominently does your site appear in leading search engines such as Google, Yahoo and Bing?**  
Our Health Check will explain what needs to be done to improve your search engine ranking.
- **Is your website accessible (as specified by the Disability Discrimination Act)?**  
Our Health Check will demonstrate how to make sure your website is legally compliant.
- **Does your website make effective use of relevant technology?**  
Our Health Check will suggest how you could make your website work smarter for your organisation.

As part of your Website Health Check, we produce a report written specifically for you, which gives you practical recommendations designed to improve your website.
